

My First Document

Finlay Campbell

July 8, 2016

Abstract

How are you doing, LaTeX?

1 Introduction

This is the introduction of my first LaTeX document, I hope you enjoy it.

$$\alpha = \sqrt{\beta} \quad (1)$$

1.1 Finlay

This is first subsection of my first LaTeX document; I hope you enjoy this, too.

2 Second Section

This is hopefully a big section,
bigger than our Subsection 1

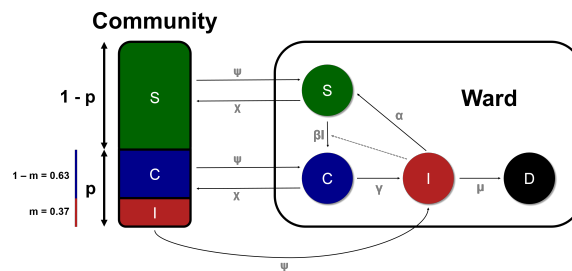

Figure 1: I don't think we have a figure yet

3 Using Sweave to combine R and LaTeX

Below we should see a plot rendered using R code

```
fig=TRUE,echo=FALSE; library(ggplot2) qplot(seq(0,10,0.01),dgamma(seq(0,10,0.01),2,2))
```

@ Now we should be seeing normal text again.

4 Conclusion

This is the conclusion. I hope you enjoyed this LaTeX document, come again.
